pixels / unit shear
model − data

1,708,854 validation pairs · 40 cases · identical feature bins · forward 0 → 0.05 · no measured cuts
Bars / bands: 1 case-jackknife SE; lower panels use paired errors · 16 × 64 draws with CRN
Radius response is in pixels per unit shear (0.2 arcsec/pixel). λ=1 has different effective strength under the two losses.
